

PROFESSIONAL SUMMARY

Certified Business Economist (CBE) and Applied Economist with a Master of Science in Applied Economics and experience conducting economic research, econometric analysis, forecasting, and policy evaluation. Skilled in applying quantitative methods, statistical modeling, and economic trend analysis to support evidence-based decision-making, economic development initiatives, business expansion analysis, and program evaluation. Experienced in working with government statistical agencies, academic research institutions, and private-sector organizations to transform complex datasets into actionable insights. Familiar with Minnesota's economic environment through graduate studies and applied economic research conducted at St. Cloud State University.

CORE COMPETENCE

Economic Analysis | Economic Development | Public Policy Analysis | Program Evaluation | Econometrics | Forecasting | Economic Impact Analysis | Statistical Modeling | Quantitative Research | Economic Forecasting | Data Visualization | Business Intelligence

ECONOMIC ANALYSIS TOOLS

- Statistical Software: R, Stata, SAS, SPSS
- Data Visualization: Power BI, Tableau
- Economic Data Sources: FRED, BEA, BLS, OECD, Census Bureau
- Research Methods: Econometric Modeling, Forecasting, Economic Impact Analysis, Program Evaluation

PROFESSIONAL EXPERIENCE

Bay State Milling Company
Supply Chain Analyst

Woodland, CA
04/2023 – Present

- Conducted quantitative analysis of 5,000+ monthly procurement and inventory transactions using Power BI and Excel, enabling data-driven inventory decisions and reducing manual reporting time by 50%.
- Developed the Order Cadence Model (OCM), an analytical framework integrating demand forecasts, inventory positions, safety stock requirements, and lead-time analysis to improve inventory planning and reduce supply chain risk.
- Built Power BI dashboards used by procurement and operations teams, reducing manual reporting time by 50% and improving visibility into key inventory and performance metrics.
- Collaborated with procurement, finance, operations, and quality assurance teams to evaluate business performance metrics and provide data-driven recommendations supporting organizational objectives.
- Applied statistical analysis to evaluate commodity demand variability and purchasing trends, supporting forecast accuracy and procurement decision-making across multiple product categories.

St. Cloud State University – Economics Department
Graduate Economics Research Assistant

St. Cloud, MN
08/2021 – 04/2023

- Conducted independent and faculty-supported economic research utilizing macroeconomic datasets from FRED, BEA, OECD, and other public sources to evaluate fiscal policy, monetary policy, and international economic relationships.
- Applied advanced econometric methodologies, including SVAR, ARDL, regression analysis, and forecasting models, to assess economic outcomes and policy impacts.
- Performed quantitative analyses of inflation, interest rates, government expenditures, labor market indicators, and other macroeconomic variables to support empirical research projects.
- Developed research reports, policy summaries, statistical visualizations, and presentations communicating complex economic findings to academic and professional audiences.
- Supported economic research evaluating fiscal policy impacts, macroeconomic performance, and international monetary transmission mechanisms to inform evidence-based economic analysis.
- Presented economic research findings and statistical analyses to faculty, graduate students, and academic audiences, translating technical results into actionable insights.
- Produced policy-oriented research reports and economic analyses used to support graduate research, academic presentations, and evidence-based evaluation of macroeconomic issues.

Ghana Statistical Service
District Data Quality Monitor (National Census Operation)

Accra, Ghana
02/2021 – 08/2021

- Reviewed and validated thousands of census records to improve data accuracy and support production of official government statistics used for planning and policy development.
- Evaluated demographic and socioeconomic survey submissions for accuracy, consistency, and completeness, ensuring reliability of national statistical reporting.
- Conducted data verification and quality assurance reviews across multiple census operations, identifying reporting discrepancies and recommending corrective actions.
- Prepared analytical summaries and quality assessment reports supporting decision-making by regional census management teams.
- Collaborated with field supervisors and statistical personnel to improve data collection processes and strengthen survey integrity.
- Supported production of official government statistics by validating demographic and socioeconomic census data used for national planning and policy development.

Caldera Equity Group LLC — Remote / Self-Directed
Market Data & Pricing Analyst (Co-Founder)

Woodland, CA
02/2026 – Current

- Conducted market research and economic analysis of real estate conditions, demographic trends, and transaction activity to support investment evaluations.
- Analyzed pricing patterns, comparable sales, and regional economic indicators to identify market opportunities, assess investment risks, and evaluate economic conditions affecting development decisions.
- Evaluated local economic conditions, demographic trends, and market indicators to support business expansion and investment decision-making.
- Conducted regional economic and industry analysis using demographic, labor market, and business data to evaluate economic trends affecting investment and development decisions.

SELECTED ECONOMIC RESEARCH

U.S. Fiscal Policy Spillovers on OECD Monetary Policy

- Applied SVAR and ARDL models to analyze fiscal-policy transmission across 30+ OECD economies, identifying significant relationships between U.S. fiscal shocks and international monetary policy responses.
- Examined international monetary policy transmission mechanisms and macroeconomic interdependencies using longitudinal economic datasets.

The Inventory Channel of Monetary Policy

- Investigated how interest-rate shocks influence inventory accumulation and price volatility in inventory-intensive industries.
- Applied time-series econometric analysis using Federal Reserve, BEA, and FRED datasets to evaluate monetary policy effects on business activity.

Order Cadence Model (OCM)

- Developed the Order Cadence Model (OCM), integrating demand forecasts, inventory positions, safety stock requirements, and lead-time analysis to improve inventory planning, reduce supply chain risk, and support data-driven procurement decisions.
- Integrated forecasting, inventory analytics, and risk assessment methodologies to support data-driven business decision-making.

EDUCATION

St. Cloud State University
Master of Science – Applied Economics and Data Analytics
Thesis: Open Macroeconomics: The Spillover Effects of U.S. Fiscal Policy on OECD Countries' Short-Term Interest Rates

St. Cloud, MN
